

Build Confidence in Caring for Children with Medical Complexity (CMC)

for Emergency Medical Services

MISSOURI
EMSC State Partnership

Enroll in the training today!

Emergency Medical Services (EMS) providers play a critical role in responding to and caring for children with medical complexity. These training modules are designed to help EMS recognize medical complexity in the home, respond with confidence, and collaborate with families and other healthcare providers.

What's Inside the Training?

- **Module 1: Introduction**
Understand the definitions of CMC and Children and Youth with Special Health Care Needs (CYSHCN), and the importance of education, planning, and teamwork.
- **Module 2: First Day Home**
Understand the importance of preparing for the first 24 hours, differentiate home and hospital care, learn key home care steps for CMC, and identify priority contacts like 911.
- **Module 3: Emergency Readiness**
Understand the importance of emergency readiness, know how to effectively communicate critical information when you're called, and learn about EMS's role in supporting CMC during emergencies and home visits.

Why This Matters for EMS Providers

- Recognize and respond to children with medical complexity in home settings
- Improve communication with families and hospital-based teams
- Be a trusted resource in high-stress, time-sensitive moments
