

# Build Confidence in Caring for Children with Medical Complexity (CMC)

for Home Health Nurses

**MISSOURI**  
EMSC State Partnership

## Enroll in the training today!

Home health nurses are a critical link in supporting the needs of children with medical complexities, especially during the transition from hospital to home. These training modules serve as an introduction to support nurses in working confidently and collaboratively with families.

## What's Inside the Training?

- **Module 1: Introduction**  
Understand the definitions of CMC and Children and Youth with Special Health Care Needs (CYSHCN), and the importance of education, planning, and teamwork.
- **Module 2: First Day Home**  
Understand the importance of preparing for the first 24 hours, differentiate home and hospital care, learn key home care steps for CMC, and identify priority contacts like 911.
- **Module 3: Emergency Readiness**  
Describe the importance and key components of emergency readiness, demonstrate how to call 911 and communicate critical information, and explain the role of EMS in emergencies for CMC and home visits.

## Why This Matters for Home Health Nurses

- Strengthen hospital-to-home care transitions
- Enhance family education and preparedness
- Improve coordination with EMS and other teams
- Empower families while reducing avoidable emergencies
