Supporting Safe and Effective School Reunification

Standard Reunification Method (SRM) V3

The **Standard Reunification Method (SRM) V3** is a nationally recognized framework for safely and efficiently reuniting students during emergencies. It provides schools with tools and processes to ensure reunification is orderly, trauma-informed, and well-coordinated.

Key Capabilities:

- Rapidly establish a Family Reunification Center (FRCs)
- Track and manage students throughout an incident
- Ensure safe, orderly, and trauma-informed reunification

SRM V3 Features:

- Step-by-step guidance for intake, tracking, and release
- Ready-to-use templates for forms, wristband/barcode systems, and family communication

Standard Reunification Method Reunification Exercise (SRM-REX)

SRM-REx is a hands-on exercise that allows schools to test and strengthen their reunification plans in a realistic, practical setting.

Key Capabilities:

- Identify strengths and gaps in your current reunification procedures
- Practicing communication and coordination between school staff, first responders, and families
- Build staff confidence in implementing SRM V3 during real incidents

SRM-Rex Highlights:

- Realistic simulation of reunification scenarios
- Staff and volunteer role assignments
- Integration of local resources, technology, and emergency protocols
